

AirCheck™ G2 Wireless Tester

The NETSCOUT AirCheck G2 wireless tester is a powerful tool designed to enable front-line IT to quickly and easily identify issues responsible for spotty connections, dead zones, and slow speeds, as well as locating rogue access points and unauthorized devices.

AirCheck G2 enhancements include:

- 802.11ac 3x3 radio to support next-generation wireless initiatives
- Link-Live integration for collaboration, reporting and results management
- 5" touchscreen display for improved ease-of-use
- Ethernet tests for AP backhaul verification
